### **Frequently Asked Questions**

### **Credentials Verification Process**

How long should I anticipate the credentials verification process will take? Most healthcare organizations anticipate 90-120 days, as this allows extra time when verification sources do not respond, or if red flags need to be resolved by the applicant or a verification source, or if other unanticipated actions are needed.

### Is there anything a provider can do to speed up the process?

Yes. Providers can greatly influence the length of processing time by contacting their verification sources (institutions, peer references) and asking each to respond to VPH verification requests as soon as possible.

### **Proctoring**

### What is proctoring?

Proctoring is confirmation of an individual's current clinical competency. The process involves direct (real-time) observation of a procedure being performed at VPH, prospective reviews to evaluate planned treatment, and retrospective review of medical record documentation. Further details on proctoring will be provided with the orientation materials.

### Reappointment

### Why do I have to be reappointed?

The Centers for Medicare and Medicaid Services' (CMS) require that all providers be reappointed at least every 24 months, to validate current clinical competency. If a provider is unable to submit a reappointment application, or is unable to complete the process, he or she will be deemed to have voluntarily resigned from the Medical Staff.
